VSME PRODUCT CATALOGUE

 E-SG.cloud

Welcome

E-SG.cloud makes ESG reporting **accurate, efficient** and **secure** for SMEs, while helping to transform sustainability efforts into a competitive advantage.

The platform is always up to date with current **EU frameworks**, including VSME and CSRD, and makes it easy to ensure compliance, create transparency and strengthen relationships with customers, employees and partners. With modern standards, an AI assistant and accurate data, you get reports that are both understandable and audit-ready.

Contact us for a free demo - see the platform in action and find out how you can get started quickly.

"Getting started with ESG reporting can seem daunting, but the most important thing is to take the first step. With E-SG.cloud, the journey becomes more manageable and creates value for the company."

Lauge Borg
Director and Founder of E-SG.cloud

Why choose E-SG.cloud?

E-SG.cloud provides companies with a solid foundation for their ESG reporting. Based on the VSME standard, we provide the most important requirements and make them practical and manageable. You get a platform that both ensures compliance and supports strategic management.

Why E-SG.cloud?

- **Efficient ESG reporting:** With a user-friendly and intuitive design, it is efficient to create your ESG report without compromising compliance.
- **Always accurate and up to date:** The platform is always updated with the latest EU directives, and the audit log ensures full traceability in data entry to ensure reliable reporting.
- **Open platform:** Open API creates synergies with your data from other platforms, minimising manual processes and the risk of errors.

Advantages of E-SG.cloud

- **Use ESG data as a basis for business development:** Structured ESG reporting creates an overview that can support better strategic business decisions.
- **Accurate, efficient and secure ESG reporting:** Get an efficient workflow with automatic data collection and updated EU requirements – all in one platform.
- **Strengthen relationships through documented transparency:** A clear and structured ESG report makes it easy to share relevant ESG data with customers, employees and stakeholders, promoting trust and openness.
- **Achieve financial gains:** Get an overview of your data and identify untapped resources. Insight into your areas of focus opens up concrete improvements that strengthen your bottom line.
- **Supports businesses of all sizes:** We help your business produce an accurate ESG report by gathering all your data in one place.

The basic VSME module:

The 11 disclosure requirements that ensure your reporting covers the essential ESG areas.

The comprehensive VSME module:

Additional reporting points that provide a deeper insight into the company's ESG performance.

The company-specific VSME module:

Customise module selection to ensure relevance for stakeholders and the company's value chain.

VSME MODULES

The 11 disclosures in the Basic VSME Module:

- B2 – Practices, policies and future initiatives for transitioning towards a more sustainable economy

Basic Module – Environment metrics

- B3 – Energy and greenhouse gas emissions
- B4 – Pollution of air, water and soil
- B5 – Biodiversity
- B6 – Water
- B7 – Resource use, circular economy and waste management

Basic Module – Social metrics

- B8 – Workforce – General characteristics
- B9 – Workforce – Health and safety
- B10 – Workforce – Remuneration, collective bargaining and training

Basic Module – Governance metrics

- B11 – Convictions and fines for corruption and bribery

The 9 disclosures in the Comprehensive VSME Module:

Comprehensive Module – General information

- C1 – Strategy: Business Model and Sustainability – Related Initiatives
- C2 – Description of practices, policies and future initiatives for transitioning towards a more sustainable economy

Comprehensive Module – Environmental Metrics

- Consideration when reporting on GHG emissions under B3 (Basic Module)
- C3 – GHG reduction targets and climate transition
- C4 – Climate risks

Comprehensive Module – Social Metrics

- C5 – Additional (general) workforce characteristics
- C6 – Additional own workforce information – Human rights policies and processes
- C7 – Severe negative human rights incidents

Comprehensive Module – Governance Metrics

- C8 – Revenues from certain sectors and exclusion from EU reference benchmarks
- C9 – Gender diversity ratio in the governance body

Company-specific module:

Tailored points that are relevant to your specific industry and stakeholders.

COMPLETE CO2 CALCULATION

CO₂ calculation models

E-SG.cloud enables systematic and accurate CO₂ calculations as an integral part of ESG reporting. The platform supports both simple manual calculations and advanced automated solutions. This allows companies of all sizes to gain a clear picture of their climate footprint and work towards targeted reductions.

The solution is based on recognised emission factors and can be adapted to your industry, energy consumption and value chain. Depending on your needs, you can choose between models ranging from free manual calculations to full integration with ERP and other data systems, giving you continuous and reliable CO₂ data.

CO₂ products

- Free manual CO₂ calculator – option to calculate scope 1 & 2 manually.
- Pro version with ERP integration (Economic, Business Central, etc.) – automation of CO₂ data, including scope 1, 2 and 3.
- Advanced model for automated CO₂ calculation of scope 1, 2 and 3 with connection to the company's own systems.

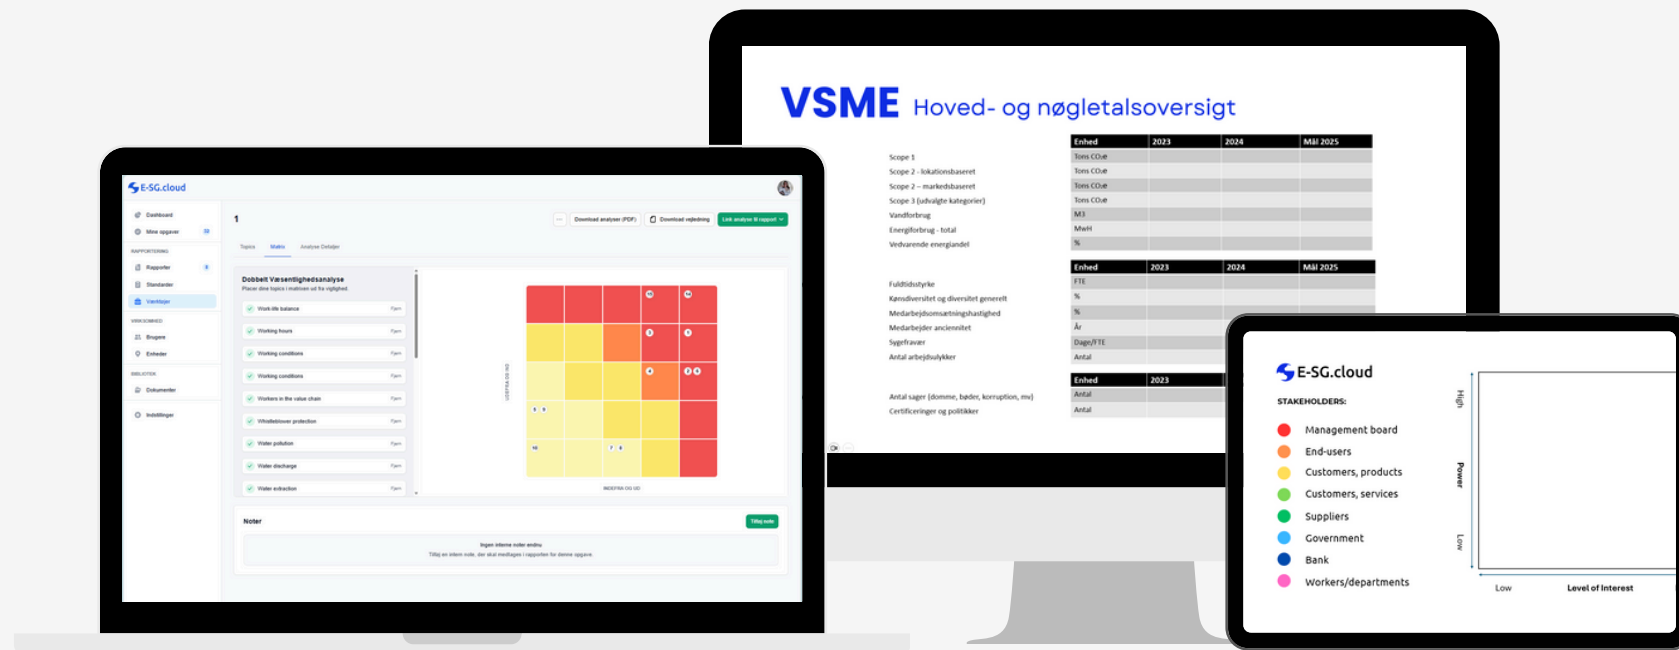

WORKING WITH PURPOSE

Expansion options

At E-SG.cloud, we enable you to take your work to the next level. With various documents, you can analyse, understand and document your impact in depth – while tailoring your reporting to your strategy, stakeholders and value chain.

- Double materiality analysis – identify ESG factors that are both financially relevant and important to the environment.
- Stakeholder analysis – map requirements from customers, suppliers, employees, authorities, etc.
- Value chain analysis – gain insight into how ESG impacts spread throughout the value chain.

EXPORTS & OUTPUTS

E-SG.cloud

2024 VSME RAPPORT

Exports & outputs

The export function in E-SG.cloud makes it easy to share and present your ESG reporting in the formats you need. Whether you need a quick overview internally or a detailed report for your auditor, you can choose the output that suits you best.

- Download reports as PDF, Excel, ZIP or XBRL
- Choose layout/template – standard or customised design
- Design templates in PowerPoint – ready-made templates so your ESG report can be tailored to your business and you have the option to expand your content with various analyses.

When ESG data translates into business value

“Our collaboration with E-SG.cloud makes it possible to document the CO₂ savings for many of the products sold through the Tingster auction house. This means that our customers now have a concrete data basis for their ESG reporting and, more importantly, they can demonstrate the positive effect of choosing recycling over new.

E-SG.cloud makes ESG measurable and usable in practice. It gives us and our customers a solid foundation for developing our business in a more responsible and transparent way.”

Emil Busch
Co-owner and COO
[Auktionshuset Tingster](#)

VSME Starter

999 kr./month

VSME Starter is our basic package and the perfect introduction to ESG reporting. This solution provides you with the most important tools to get started quickly, without requiring significant resources or prior experience.

- Full access to the platform's basic features
- Ability to create users without restriction
- Standard reporting tools
- Export to PDF and Excel

VSME Pro

Contact us for price

VSME Pro is aimed at companies that want automated CO₂ calculation with a direct connection to their ERP system. With this package, you get both efficiency and precision in your ESG work.

- Everything from Starter
- Automated CO₂ calculation of scope 1, 2 and 3
- Integration with ERP systems (Economic, Business Central)
- Access to PowerPoint design templates

VSME Advanced

1999 kr./month

VSME Advanced is designed for companies with complex needs and integration with their own systems in addition to ERP. This package provides the flexibility to connect other data sources to ESG reporting.

- Everything from Pro
- Integration with other systems for automated CO₂ calculation
- Option for advanced report formats, including XBRL
- Extended flexibility in reporting

CSRD Pro

Contact us for price

CSRD Pro is our most advanced solution, developed for companies with the highest reporting requirements. Here you get a complete package that covers the entire CSRD and provides access to all advanced features and analyses.

- Everything from Advanced
- Full support for CSRD requirements
- Access to all extension modules (double materiality, stakeholder analysis, value chain analysis)
- Advanced export and documentation

CONTACT US

Get started and experience E-SG.cloud

Getting started with E-SG.cloud is easy. We offer both demos and the option to book a meeting directly in our calendar. Here you can see the platform, try out the CO₂ calculations and ask questions about how the solution fits your business.
